

Single rocker with bell symbol for push button white Simon 75

REF. 75017-31

BASIC INFORMATION

DESCRIPTION

Simon 75 is a series of electric mechanisms with infinite combinations, frames in 13 finishes, parts pieces in 15 colours and rockers in 6 colours. The rectangular design of the trim frame allows us to adopt two different aesthetic shapes, a series suitable for the most varied tastes in which we can find the individual Rocker with bell symbol for push-button switch in white, although we are before a piece available in six different finishes, it is a very attractive piece thanks to its easy installation both in surface-mounted and to be recessed in a universal box. It is a very resistant rocker for the materials made of thermoset composites with which it has been manufactured, so it is not affected by high or low temperatures. Its easy cleaning also helps with maintenance, which together with its low price makes it one of the most cost effective parts in the electrical systems market.

FINISH

Ivory

MATERIAL

Thermosettable

PACKAGING CONTENTS

Single rocker and fastening bracket

SYMBOL

Bell

COMPATIBILITY

Simon 75 and Simon 77 mechanisms

ETIM CLASS

EC000011

REMARKS

Available in 6 finishes. It is recommended to choose a frame with a base the same colour as the selected rocker.

TECHNICAL INFORMATION

AVAILABLE MARKET

CE

IP RATING

IP20

OPERATING TEMPERATURE RANGE (°C)

5 - 40 °C

NUMBER OF POSSIBLE ELEMENTS

1 element
