

Cover with safety device for German socket outlet graphite Simon 75

REF. 75041-68

BASIC INFORMATION

DESCRIPTION

The cover for Schuko socket outlet is of the Simon 75 series and built-in safety device. The installation is very simple and can be carried out by means of recessed or on the surface-mounted, depending on the tastes and needs of the room or the mechanism. The cover is available in a stylish grey colour that will be perfect wherever it is located. However, this product offers a total of seven finishes, so it is advisable to select a rocker combinable and a frame of the same colour, so that we thus achieve a perfect harmony appearance of the final set. The cover is made of thermoplastic material, which gives it a high resistance to high or very low temperatures ranging from -25 to + 50 degrees centigrade. Also the product has a great hardness that protects against challenges external as can be knocks or scratches. Its maintenance is very simple and can be carried out with a cloth slightly dampened with soap and water.
