

Interchangeable case for 3 elements frame blue Simon 27 Play

REF. 2700637-064

BASIC INFORMATION

DESCRIPTION

Interchangeable cover designed for a frame for 3 elements, it has a very original design, with blue finish and is made of thermoplastic, a material characterized by its resistance to extreme temperatures. However, the manufacturer recommends installing the part in environments with a temperature range between 5 and 40° to ensure that the part is kept in the best conditions. This interchangeable sleeve for a frame is suitable for surface and flush mounting and has dimensions of 86x236 mm One of its most appreciated qualities is that it can be installed vertically or horizontally, according to the user's taste. The piece is part of the Simon 27 Play series, a collection that comes with the aim of satisfying current needs. Its mechanisms, therefore, have been made to dynamize all kinds of environments, thanks to its varied designs. Remember to choose rockers and covers to match the sleeve.

FINISH

Blue

MATERIAL

Plastic
