Frame for 4 elements gold Simon 75

REF. **75640-66**

BASIC INFORMATION

DESCRIPTION

The Simon 75 series is the series of colour, offers us an infinite number of combinations thanks to the wide variety rendering of the frames, the parts pieces and the rockers. In this case, we have a frame for 4 elements made of thermoplastic with a gold finish. It is suitable both for surface and flush mounting and measures 80x301 millimetres. It is also available for 1,2 and 3 elements. If we want to maintain the frame as the first day, it is not recommended to use abrasive products containing chlorine. A series that allows us to play with the colours, but also with the shapes, as you can install the trim frame in two different positions, another advantage of this series is its compatibility with the mechanisms of Simon 77, which allows us to save time in your installation, Simon has more than 100 years working for offering us quality products at a very competitive price.

FINISH

Gold

MATERIAL

Thermoplastic,Aluminium
