

## Double rocker for blinds mechanism with security latching ivory Simon 27 Play

REF. 27028-32

## BASIC INFORMATION

### DESCRIPTION

In ivory colour, we find this double rocker for blind mechanism with latching of security. The piece includes an engraving of up and down blinds. It is designed for 2 modules, has dimensions of 45x45 mm and belongs to the Simon 27 Play series. It is available in 2 different finishes. However, in order to achieve a harmonious set, we recommend that the colour of the frame to be used with the frame with which it will be used. The piece can be recessed or placed on the surface-mounted that you want, as it is suitable for this purpose. It is manufactured with thermoplastic materials; hard and resistant. These features allow the rocker to be functional between 5 and 40° C, being able to withstand extreme temperatures of up to -25 and 50° C, following the current regulation. It can be used in any type of home, business or local, with the guarantee and security of a brand consolidated in the market.

### FINISH

Ivory

### MATERIAL

Plastic

### PACKAGING CONTENTS
