

Flat voice and data plate with dust cover for 2 Systimax® RJ45 connectors graphite Simon 82

REF. 82009-38

BASIC INFORMATION

DESCRIPTION

Quality and good price are not at odds. An example of this binomial is the Voice and Data Plate with dust cover for the RJ-45 format in graphite colour of the Simon 82 series, which is compatible with Systimax connectors, it is a type of flat base plate that includes a RJ-45 adapted module with double connector., a soft cloth slightly moistened in soapy water is sufficient to clean it, avoiding to use for this purpose abrasive cleaners containing chlorine. It is a 55x55 mm plate designed to withstand a temperature range of 5 to 40° C and a maximum temperature of -25 to 50° C. This resistance is achieved thanks to the thermoplastic components with which it has been elaborated. It is available in six different finishes, which is why it is recommended to choose a frame with the same baseboard colour as the rocker selected.

FINISH

Graphite

MATERIAL

Plastic

PACKAGING CONTENTS

Plate

SYMBOL
