

Fuse holder cap with blown-fuse indicator window grey Simon 75

REF. 75091-35

BASIC INFORMATION

DESCRIPTION

Fuse plugs are indispensable elements for the maintenance of a safe electrical installation. Therefore, it is vitally important to choose quality products and good performance. The fuse holder plug with window for fusion indicator Simon 75 is a heat sensitive device specially designed to apply a pressure control reliable and highly efficient. It incorporates a window that acts as a fusion indicator at the determined detection temperature, assuring an adequate identification of any incidence. Available in an individual and 1 element version, it has a small and compact design, so that it is very easy to handle and fit in any installation. In addition, this fuse holder plug is made of high quality ceramic material with a grey finish, at Simon we have extensive experience in selling electrical material, and it is the quality of our products that makes us leaders in the sector.
