

Single rocker for two-pole switch with pilot light and I/O symbol white Simon 75

REF. 75032-30

BASIC INFORMATION

DESCRIPTION

This individual rocker is of the Simon 75 series and is designed for a double-pole switch with pilot. The rocker built-in an I / O engraving (input / output) that contributes to its easy operation by doing so highly user-friendly and interactive. The product is presented in white colour finish, making its integration in any room, but, it should be noted that this rocker Simon 75 is available in a total of six finishes possible, so it is advisable to choose the frame with the same baseboard colour as the rocker that we select. Its installation is very simple and offers the possibility to be carried out by means of recessed or directly on surface-mounted. The rocker is made of thermoplastic, which provides a resistance and hardness extra the product, extending its service life and increasing your security. Maintenance is very simple and will be performed using a soft damp cloth with soap and water. It is not necessary to use any cleaning product, and it is not recommended to use abrasive products and with chlorine that can give the structure.
