

Double rocker for switches ivory Simon 75

REF. 75026-31

BASIC INFORMATION

DESCRIPTION

With Simon the habitability of the rooms of a house improves. The set of mechanisms of the Simon 75 series offers a wide range of options to suitably equip each space, available in six finishes, the double Rocker for ivory control mechanisms has become one of the most demanded parts. Having two mechanisms in one increases the possibilities that we can apply to our electrical systems from a single point, saving money and space. Its resistance to knocks is achieved thanks to the thermoset materials with which it has been elaborated, which translates into an ideal rocker for places with a lot of daily traffic of people. The innovative design of this rocker allows you to recess the product or to place it on the surface-mounted depending on each space. Short-, medium- and long-term reliability.

FINISH

Ivory

MATERIAL

Thermosettable

PACKAGING CONTENTS

Double rocker and fastening bracket
