Simon iO key for dimmer switch gloss white Simon 100

REF. **10002020-130**

BASIC INFORMATION

DESCRIPTION

Individual touch switch Simon iO for adjustable switch, part of the Simon 100 collection. Finished in bright white, the device has been manufactured with PMMA material and a thermoplastic base that gives it great durability and resistance. Not surprisingly, the degree of IP protection, which defines the protection against dust and moisture, is the highest possible: 20.

It has an ion Z-wave protocol with power system from the mechanism itself, and the format of its installation is horizontal and only occupying half an element.

For proper cleaning, it is recommended not to use abrasive products containing chlorine or similar substances and clean with a soft cloth slightly dampened with soap. Similarly, it must be ensured that during its operation the environment is at a temperature between 0º C and 40º C, while during storage it must be between -25º C and 75º C.

This standard type switch complies with directive 2011/65 / UE RoHS + directive 2014/53 / UE RED + EN 50581: 2012 + EN 60669-2-5: 2016 + ETSI-300-220-2 v2.4.1.
