

Spare part square sealing gasket for IP66 watertight floor box with 2 Simon K45 mechanisms

REF. KFS2002

BASIC INFORMATION

DESCRIPTION

The square sealing gasket for the IP66 cubicle of the Simon K45 series has dimensions of 130 x 130 x 2 mm. With a highly innovative design thanks to the avant-garde lines that define its shape, we are looking at a product intended as a replacement for the square sealing gasket that fits between the cubicle and the mechanism holding unit. The holding unit is not included. The self-extinguishing thermoplastic and halogen-free material is the compound with which its resistant and durable structure has been manufactured. This material guarantees no flame propagation in case of fire and low toxicity in case of smoke emission, making it one of the safest elements in this range. All of this is offered with the best quality-price ratio that we can find today in the sector of products intended for electrical installations in homes and businesses.
