

Single rocker for switches aluminium Simon 82 Centralisations

REF. 82010-53

BASIC INFORMATION

DESCRIPTION

Rocker for control mechanisms Simon, which aims to a modern and avant-garde finished in aluminium. This is of individual version, for a single element, which is perfect to be installed in an infinite number of rooms, without mermaid in all the decoration or the design of the space. This rocker is part of the Simon 82 series. The rockers Simon are available in a total of five finishes very different. For this reason, and to maintain an appearance enviable, it is advisable to choose the frame in the same finish as the baseboard of the selected rocker. Therefore, a frame Simon of aluminium would be the perfect combination for this product. This is the individual version, of a single element, the rocker. It has no engraving or signaling function and can be installed in two different shapes: On surface-mounted or embedded. for their longer service life simply clean the cotton rocker with a cloth with soap and water.
