

Presence detector with 105 coverage angle and approximate range of 8 meters, white lens Simon 100

REF. 10001343-039

BASIC INFORMATION

DESCRIPTION

This product allows you to control and regulate the light according to the presence of people in the space. It is a presence detector with a coverage angle of 105  and a range of approximately 8 meters. It has a white lens. A product from the famous Simon 100 series. Do you need an article number? Here it is: 10001343-039. A detector that can be recessed with easy installation. Check the available installation manual. The materials used in the various electronic components are reinforced with a halogen-free thermoplastic insulation, guaranteeing maximum safety and resistance to weathering, shocks and temperatures ... resistant to extreme temperatures (optimum range from 0 to 40  C, but can withstand temperatures of 75  C). Here you can check all the features of this detector, as well as other relevant information, such as compatible products and logistics data.
