Support with blue LED, replacement for mechanisms with light indicator or pilot light Simon 27 Play

REF. **2700802-064**

BASIC INFORMATION

DESCRIPTION

It is a colour blue LED bracket, a replacement for mechanisms with luminous or pilot light that is part of the Simon 27 Play series, it can be installed easily and quickly thanks to the insertion function of this part, a system that makes it possible to reduce the times ostensibly. The bracket is presented in individual packs and has been manufactured in compliance with the regulations, the quality of its materials makes it possible to be installed in all kinds of environments, as it is extremely resistant to heat. The signal conditioning instrument has a consumption of 0.55 mA. To keep it in top condition, remember to clean the device with a soft, dry cloth and avoid abrasive products containing chlorine. Do not have any kind of engraving, the Simon 27 Play collection brings a different concept that allows to redecorate the spaces through functional and totally customizable mechanisms.
