

ELECTRIC MOSQUITO KILLER 4W COATI

REF. IN127120

BASIC INFORMATION

DESCRIPTION

The anti-fly and mosquito lamp from our Coati series allows for the elimination of mosquitoes and other flying insects indoors thanks to its G5 75 BL F4W fluorescent lamp. It has a degree of dust and water protection of IP20, so it is not suitable for outdoor use. The elimination is done by electric discharge, meaning it does not use harmful chemical products for the environment. The ultraviolet light, harmless to any living being, acts as an attractant, and the electrified mesh fulfills the other part of the objective. It features a handle for easy transport, as well as a lower collection tray and a special brush for cleaning and removing the insects. It provides coverage of 20m² and has a 1.5-meter cable for its power supply with a consumption of 4 watts.
