

Interchangeable case for 4 elements frame red & white

Simon 27 Play

REF. 2700647-803

BASIC INFORMATION

DESCRIPTION

The easiest option for customization is the interchangeable frame compatible with four elements with red and white finish that you can find in the Simon 27 Play series, a collection that doesn't sacrifice a single electronic function, being able to control the different spaces in your home without needing to do without a special design. Take advantage of transparent sleeves and rockers to personalize them with the images that best adapt to the needs of each one of the corners of your home. If necessary, you can add extra functions such as antibacterial, increasing the effectiveness against the transmission of bacteria when operating switches and plugs. It is ideal for use in health centres or nurseries, thus avoiding contact with switches that could carry viruses or bacteria.

FINISH

White/Red

MATERIAL

Plastic

COMPATIBILITY

Simon 75, Simon 26, Simon 27 Play and Simon 75* mechanisms (*check compatibility)
