

Blind cover aluminium Simon 75

REF. 75800-33

BASIC INFORMATION

DESCRIPTION

The most innovative design and maximum security are two hallmarks that have accompanied Simon over the last 100 years. These two qualities are also present in the Simon 75 series, which is made up of four parts that offer an answer in the form of solutions to all of them: Mechanisms, frames, trims and rockers. In the last group we find the Blind Cover aluminium included in this range. All are advantages in this piece, available in six finishes, whose easy installation, both in surface-mounted and recessed in the wall, has turned it into a cover present in all types of public and private buildings such as offices, commercial establishments, hotels and restaurants, headquarters of official bodies, hospitals or educational centres. Stands out for its great resistance thanks to the thermoplastic materials with which it has been manufactured. To clean your structure is sufficient with a damp cloth, maintenance with which we will prevent its oxidation over time.
