Wire outlet mechanism with 4 double terminals and fixing cable tie champagne Simon 31

REF. **31801-34**

BASIC INFORMATION

DESCRIPTION

The cable outlet mechanism with 4 double terminals connection and fixing cable tie is part of the range Simon 31 and is a product essential to bring order and organization to any electrical panel. The mechanism of cable outlet is specially designed for wire to wire from 1.5 to 2.5 millimetres long, section 380 volts. It works by wire stripping of 7 millimetres and measures 64 x 65 millimetres. This mechanism output capes enables the use of 4 double terminals, making it multifunction. Without a doubt, it is a product necessary in any electrical panel, especially those that provide energy by a number of cables. Thanks to this mechanism of cable outlet, components and cables on a electrical panel will appear perfectly ordered and organized, which in the long presents great advantages. Between them, stands out the facilitation the maintenance of the electrical panel, its possible future expansion and, above all, the solution quick against possible problems. In addition, this product helps to plan the space from the beginning and its trim cover and beautiful champagne colour make it an element plus the design of the room or furniture where it is. Stand out its manufacturing materials that consist of metal components with halogen-free insulation.
