

IP66 Mechanism holder and security frame for 45x45mm and 22,5x45mm K45 mechanisms

REF. KFH100SEC/72

BASIC INFORMATION

DESCRIPTION

Simon completely renews its range of waterproof floor boxes for indoor and outdoor environments. This is a mounting frame with a locking mechanism for environments that require restricted access, with capacity for 1 K45 function of 45x45mm and another of 22.5x45mm. In combination with its base, it will allow installation in technical flooring or pavement. The product design, combined with its stainless steel manufacturing, achieves a robust, solid, and secure installation as it withstands a water jet of 1 kg/cm² from any direction, reaching an IP66 protection degree when the lid is closed. It also supports a maximum load of 1500 kg and an IK08 impact resistance. It maintains an optimal cable bending radius for high-category voice and data connections. Our accessory for plug connection with a closed lid is available, allowing us to keep our connections active with an IP54 (see reference KFA1001), the option to level our box in case of having an irregular slab (see reference KFA1003), or the capacity to link more than one box (see reference KFA1002).
