Cover with safety device for German socket outlet champagne Simon 82

REF. **82041-64**

BASIC INFORMATION

DESCRIPTION

Schuko is the name given to a socket system (plug + socket) of type F according to the EEC 7 standard. In other words, both the plug and socket are equipped with pins of grounding protection via hooks instead of pins. This cover in champagne colour, with safety device, is used for the socket outlets system with plug, and is of the Simon 82 series, it does not include engraving. It is made of galvanized thermoplastic material and measures 55 mm high x 55 mm wide. For its correct installation it is necessary to use a universal recessed box or, in its absence, a baseboard surface-mounted. If we want to keep this piece as new over time, it is important to avoid the use of abrasive cleaners containing chlorine and clean with a soft, dry cloth.

FINISH

Champagne
