

Single rocker for switches with light indicator white Simon 75

REF. 75011-30

BASIC INFORMATION

DESCRIPTION

Switch rocker for control mechanisms with indicator light. It is wide module and does not include any type of engraving on its surface. Its colour is white, but we can also find it in 5 more elegant finishes, to choose the one we like best or best combined with the decoration of our spaces: Ivory, aluminium, grey, bronze and graphite. To obtain a symmetry throughout the set of the mechanism, it is recommended to choose a frame with the same baseboard colour as the rocker selected. Its installation can be performed either in surface-mounted and through flush-mounted by means of a universal box. It is made of thermoset material and for its correct cleaning we recommend the use of a soft cloth moistened in soapy water. It belongs to the Simon 75 series, which offers users multiple colour combinations and a wide range suitable for all types of decorative spaces.

FINISH

White

MATERIAL

Thermosettable

PACKAGING CONTENTS
