Neutral push-button switch 10A 250V~ with fast terminal connection system ivory Simon 27 Play

REF. **27659-62**

BASIC INFORMATION

DESCRIPTION

This neutral push-button switch for elements of up to 10A of intensity and 250 volts is part of the Simon 27 Play series. Simon products are looking for always substituting the function for which were designed, but at the same time, become decorative elements of the room where it is installed. For this reason, this product comes in a beautiful ivory colour that will give sophistication to the place where it is. The installation of the push-button switch is very simple and is carried out by means of recessed or surface-mounted. Its rocker operation is also simple and very interactive and user-friendly. The dimensions of the switch are 45 x 45 millimetres and requires quick terminal connection or for their start-up. The product is manufactured with metal components and the trim is made of thermoplastic, which gives the set of security is required, as it is able to work optimally low temperatures very high or very low. On the other hand, these materials ' s hardness to switch and thanks to this it can withstand external challenges with greater ease, as they can be knocks or scratches.
