

Interchangeable case for 4 elements frame vintage black silver Simon 27 Play

REF. 2700647-804

BASIC INFORMATION

DESCRIPTION

The electrical mechanisms of the Simon 27 Play series are the most recommended because of their quality and low price, but also because of the enormous range of solutions they offer when it comes to renovating the decoration of a room, with sophisticated and highly decorative elements to the taste of the client. A clear example is this interchangeable case for frames of 4 elements with decoration in black and silver vintage. Available to combine with rockers and covers to the client's personal taste, we recommend harmonizing with graphite finishes in colour that offer an optimal look to the set. One of its great advantages is that it is very easy to install, and is compatible with up to 8 narrow modules (horizontal or vertical). It has been manufactured in thermoplastic material painted or of high quality and high thermal resistance. Suitable to be recessed in any installation, this interchangeable sleeve is a simple and decorative solution at a very reasonable price.

FINISH

Vintage black silver

MATERIAL

Plastic
