

Single rocker for switches with pilot light graphite Simon 75

REF. 75012-38

BASIC INFORMATION

DESCRIPTION

The individual Rocker for pilot control mechanisms in graphite colour is used with the range of mechanisms surface-mounted and recess of the series Simon 75. The set of mechanisms that make up the Simon 75 range offers a wide range of options to suitably equip each space. This is one of the reasons why the products included in this series have become some of the most popular choices Simon when it comes to furnishing both public and private buildings. This is a rocker available in six finishes, so it is recommended to choose a frame with the same baseboard colour as the selected rocker. Its easy maintenance and cleanliness allow its structure does not rust with the passage of time, thanks, among other reasons, to the quality of the thermoplastic components with which it has been manufactured.

FINISH

Graphite

MATERIAL

Thermostable

PACKAGING CONTENTS

Single rocker and fastening bracket

SYMBOL

Without engravings

COMPATIBILITY

Simon 75 mechanisms

ETIM CLASS

EC000011

REMARKS
