

Single rocker for switches with pilot light white Simon 75

REF. 75012-30

BASIC INFORMATION

DESCRIPTION

The individual Rocker for pilot control mechanisms is used with the white range of mechanisms for surface and flush mounting of the series Simon 75. The set of mechanisms that make up this wide range offers an extensive number of options to conveniently equip each space, so it is the most chosen to equip both private homes and large public and private buildings. This rocker allows you to choose the frame with the same baseboard colour as the rocker selected from the six finishes available. Its easy maintenance and cleanliness allow its structure does not rust with the passage of time, thanks, among other reasons, to the quality of the thermoplastic components with which it has been manufactured, which have a direct relationship with the resistance of this piece to knocks or small accidents that it may suffer in the daily use of it.

FINISH

White

MATERIAL

Thermostable

PACKAGING CONTENTS

Single rocker and fastening bracket
