

Back kit for 2 elements with 1 Schuko socket outlet, 1 intermediate push-button switch and 1 USB charger Simon 100

REF. 10010207-039

BASIC INFORMATION

DESCRIPTION

Bedroom kit mechanism of 3 elements comprising a socket-outlet base, a pulsating crossover and a USB socket. Ideal for comfortably charging 2 devices while you sleep, such as your mobile phone and e-book, and turning the light on or off when you need it. This mechanism, the Simon 100 series, offers a perfect alignment of all its components because all the elements are supported by it. An uncomplicated assembly even in irregular environments. Its installation is very simple and safe: 1 click and without stripping wire! How? The wire is inserted unpeeled into the terminal and the lever is pressed until it clicks. Is already. And without tools! Being single body, it provides rigidity to the whole set and its comfortable fit is a huge time saving. The removal is very easy because its non-returnable front clips allow one-to-one stripping.
