BASIC INFORMATION

DESCRIPTION

The prestigious and honored Simon 100 series was created to commemorate our centenary, a series designed for easy interaction. This is why it is the most intuitive, the simplest and the most comfortable in terms of use. It has horizontal switches, which gives greater surface contact. Thanks to the surface mounted screen, we can adjust the light intensity with just one finger. With just one gesture, we can create the atmosphere that suits us at all times. This series is distinguished by the inclusion of more functions in the same space. Here are a few examples: raising and closing the blinds, connecting the television or charging the mobile phone using the USB port. We are looking for a frame, comprising at least 1 element, which is part of the Simon 100 series, the grip is in thermoplastic and the structure in PMMA with a finishing quartz effect. It measures 84x84 millimeters and a depth of 9.7 millimeters. The Simon 100 series is designed to be used with your eyes closed.
