

Rocker for switches transparent Simon 27 Play

REF. 2720010-108

BASIC INFORMATION

DESCRIPTION

Changing the image of a room with Simon 27 Play is as easy as clicking on the frame with any of its covers available in 5 ranges: Colour, arctic, extreme, metal and transparent. For example, with the Rocker for transparent control mechanisms included in this series, it is a rocker sleeve with dimensions are 45x45 mm for its installation, it is necessary to use a universal recessed box or, in its absence, a baseboard surface-mounted. This reference only includes the embellishing rocker, so to complete the function, a mechanism must be acquired and replace the included rocker. The thermoplastic is the material with which it has been manufactured in compliance with the current regulation in the sector, a component that gives it great resistance to knocks and scratches, as well as an extended durability over time.

FINISH

Transparent

MATERIAL

Plastic

PACKAGING CONTENTS

Single rocker

SYMBOL

Without engravings

COMPATIBILITY

Simon 27 Play mechanisms

ETIM CLASS

EC000011

REMARKS

This article includes only the trim rocker. To complete the function you need to purchase a mechanism and replace the rocker included.
