

Cover with safety device for German socket outlet white Simon 75

REF. 75041-60

BASIC INFORMATION

DESCRIPTION

The security in electrical systems is the *raison d'être* of Simon, in his 100-year history. Concern about this aspect has been the greatest concern every time a new product has been launched on the market. The Cover with safety device for Shuko socket-outlet in white of the Simon 75 series is the best example of this. Available in seven finishes, which makes it possible to choose a frame with the same baseboard colour as the rocker selected, it is a cover suitable for both surface-mounted or to be recessed. The thermoset materials with which it has been manufactured avoid any accident even if it suffers high temperatures, being a damp cloth enough to clean it and maintain its structure as the first day. The safety device included makes this cover ideal for spaces with minors such as private homes, schools or children's hospitals.
