

Trim plate for cable outlet for 1 element black Simon K45

REF. K10/14

BASIC INFORMATION

DESCRIPTION

One of the best-selling products of the series Simon K45 is the Trim plate for cabling for one element in black colour. Incorporate rings to allow the cabling fixing using clamps and having a wire cross-section of 2.005 mm² are two of the great advantages of this element. Suitable for surface-mounted and recess, the dimensions of this plate are 45 x 45 x 9 mm. Other outstanding characteristics is its hardness and resistance of its structure, which has been manufactured with thermoplastic free of halogen components which guarantees no flame propagation in case of fire and the low toxicity in case of smoke. Also, the versions of plates provide access through a tube or cable gland with the combination of separate cabling and by means of 20 x 30 mm trunking. All this with the best quality-price ratio that there are on the market today.

FINISH

Black

MATERIAL

Plastic

COMPATIBILITY

Simon K45 enclosures for installation in the wall, floor, ceiling and furniture and Simon 500 Cima enclosures (need to be combined with the K45 to 500 Cima adaptor ref.50012088-038)
