

Double rocker for set of 1 2-way switch and 1 push button with bell symbol white Simon 28

REF. 28027-30

BASIC INFORMATION

DESCRIPTION

Double rocker for group of 1 2-way switch and 1 push-button switch with bell symbol and colour in white finish, belonging to the series Simon 28. This rocker is perfect to be installed both flush mounted and surface-mounted, located in rooms with a temperature between 5 and 40°C, approximately, although it can withstand extreme temperatures of -25 to 50°C, making it, therefore, ideal for any type of climatology. Manufactured in thermostable material, it is a material very easy to clean and keep it in perfect condition, as it will only need to wipe it with a soft cloth slightly moistened in soapy water and without resorting to the use of cloths or abrasive cleaners containing chlorine. The series Simon 28 is available in white colour, so that it is used for projects in which it seeks the discretion and the integration and also breaks stylistically thanks to the detail of its rocker ergonomic divided into two parts.
