Interchangeable case for 4 elements frame stainless steel Simon 27 Play

REF. **2700647-042**

BASIC INFORMATION

DESCRIPTION

What features define the products in the Simon 27 Play series? One of them is their appearance, which means the products are ideal for decorating, thanks to their bright colours and soft lines. A good example of this is the interchangeable cover for frame for 4 elements in stainless steel finish included in this range, which is ideal for installations in which several elements need to be coordinated and controlled from the same point. It is recommended to combine it with graphite coloured rockers and covers. Simon 27 products offer functionality at the best price that can be found in the market today. This cover is suitable for flush mounting on walls and can be installed horizontally or vertically. Manufactured in galvanized thermoplastic material, its 86x306 mm dimensions are compatible with 4 large modules or 8 narrow modules.

FINISH

Stainless steel

MATERIAL

Plastic

COMPATIBILITY

Simon 75, Simon 26, Simon 27 Play and Simon 75* mechanisms (*check compatibility)

PACKAGING CONTENTS
