

IP66 watertight concrete floor box empty kit for 2 Simon K45 mechanisms + 1 narrow blind cover and sheath

REF. KGH200CF/72

BASIC INFORMATION

DESCRIPTION

Simon completely renews its range of waterproof floor boxes for indoor and outdoor environments. This is a kit that includes the manual closure mechanism frame with capacity for 2 K45 functions of 45x45mm and another of 22.5x45mm, to be integrated into the included tub for installation on the floor. We have an IP66 trimless box measuring 163 x 115 mm, so it will blend perfectly into our floor. The product design, combined with its stainless steel mechanism frame, ensures a robust, solid, and secure installation as it withstands a water jet of 1 kg/cm² from any direction, achieving an IP66 degree of protection when the cover is closed. It also supports a maximum load of 1500 kg and has an IK08 impact resistance. It maintains an optimal bending radius for wiring in high-category voice and data connections. Our accessory for plug connection with closed cover is available, allowing us to keep our connections active with an IP54 (see reference KFA1001), the possibility to level our box in case of having an irregular floor (see reference KFA1003), or the capability to link more than one box (see reference KFA1002).
