Flat voice and data plate with dust cover for 1 AMP® RJ45 connector white Simon 31

REF. **31085-60**

BASIC INFORMATION

DESCRIPTION

The series Simon 31 returns to surprise us once again. This time with the flat plate for voice and data with dust cover for an RJ45 connector in white colour present in the catalogue of this range. This is an element, available in two finishes, so that Simon recommended to choose a frame with the same colour of the selected plate. With dimensions of 64x65 mm, it is an element suitable for surface-mounted and recess, having been its components made of thermoplastic materials, materials that allow it to give maximum performance to adverse conditions. Also, this is a type of flat base plate, compatible with AMP connectors and includes an adapted RJ-45 module with a simple connector. All these qualities are not reflected in the price of the same, being the most competitive that we can find in the market today.
