

Plate for rotary electronic mechanisms white Simon 27 Play

REF. 27054-35

BASIC INFORMATION

DESCRIPTION

Protecting the mechanisms of the different systems installed in our homes or companies will increase the service life of the same. The plates, rockers and covers will also prevent electrical and electronic systems from suffering unexpected accidents that affect their own internal functioning. For this purpose, we have the Plate for rotating electronic devices in white colour included in the Simon 27 Play series, available in 2 finishes, so it is recommended to choose a frame with the same colour of the selected plate, has a size of 45x45 mm and is compatible with products from the wide range of Simon. Thermoplastic or is the material with which it has been manufactured in compliance with the current regulation. Its design allows it to withstand extreme temperatures, both high and low, being suitable for surface and flush mounting. Two modules make up this plate, which is rated as one of the most functional on the market.

FINISH

White
