

Push-button switch 10A 250V~ with built in light and fast terminal connection Simon 28

REF. 26160-39

BASIC INFORMATION

DESCRIPTION

This control mechanism is part of the series of Simon products 28. It is a push-button switch for devices with current up to 10A of intensity and 250 volts. Stands out for its simple quick terminal connection system. The push-button switch has a luminous indicator light that gives a touch to the mechanism modern and modern, but the Simon products offer great versatility. In this sense, if you want to replace the indicator light can be done combined with the product with reference number 31802-31. The operation of the push-button switch is extremely simple and so tilting. So, it is a highly interactive and user-friendly for the user. Simon is characterized by its high quality products. This is achieved using in its manufacturing the best materials of the market. In this case, the push-button switch is made of metal components with halogen-free thermoplastic insulation. These materials give it great resistance to high and low temperatures, so that the product continues to operate optimally. It is also capable of withstanding challenges external and scratches and knocks.

MATERIAL

Thermoplastic

COMPATIBILITY

Simon 28 frames
