

Flat voice and data plate with dust cover for 1 Systimax® RJ45 connector ivory Simon 82

REF. 82008-31

BASIC INFORMATION

DESCRIPTION

Flat base plate of voice and data with dust cover for 1 RJ45 connector and Systimax ®, in ivory colour (even if it is available in 6 different finishes and is always recommended to choose the frame with the same baseboard colour as the rocker selected) and belonging to the Simon 82 series, which offers a balance and simplicity that creates trend. This plate is suitable both for surface and flush mounting, in places with a temperature located between 5 and 40°C, although it is able to withstand extreme temperatures of -25 to 50°C, approximately, being perfect for any type of HVAC. It measures 55x55 mm and is made of thermoplastic, a material that is very easy to maintain and clean, as it will only need to use a soft cloth, slightly dampened in soapy water and never use abrasive cloths or cleaners containing chlorine, as they could damage the plate and do not work correctly.
