IP66 watertight concrete floor box kit with 2 french socket outlets + 1 narrow blind cover and sheath

REF. **KGH220CF/72**

BASIC INFORMATION

DESCRIPTION

Simon completely renews its range of watertight floor boxes for indoor and outdoor environments. This is a kit that includes a manual closing mechanism frame with 2 French sockets and 1 K45 blind plate of 22.5x45mm, to be integrated into the included tray for installation on the floor. We are looking at a trimless IP66 box measuring 163 x 115 mm, so it will fit perfectly into our floor. The product design, combined with its mechanism support frame made of stainless steel, ensures a robust, solid, and secure installation as it withstands a water jet of 1 kg/cm^2 from any direction, achieving an IP66 protection grade when the cover is closed. It also supports a maximum load of 1500 kg and has an IK08 impact resistance. It maintains an optimal cable curvature radius for high-category voice and data connections. Our accessory for connecting the plug with the cover closed is available, allowing us to keep our connections active with an IP54 (see reference KFA1001), the possibility to level our box in case of an uneven floor (see reference KFA1003), or the ability to link multiple boxes together (see reference KFA1002).
