

Frame with intermediate piece for 4 half elements (2 elements) with centre frame white Simon 27

REF. 27615-65

BASIC INFORMATION

DESCRIPTION

This product is part of the Simon 27 Play series, it is a frame designed with intermediate piece for four half elements or two elements, with frame-holder. It measures 146 x 85 millimetres. It is installed in a very simple way by recessing, and can be installed vertically or horizontally, depending on the position of the mechanism that protects and enhances. It comes in a traditional white colour that will be in almost any room of the home, office or place where it is placed, so as to achieve a perfect aesthetic result, it is recommended to combine with rockers and white base of the same colour. Its components are made of thermoset material and the frame-holder is metal, which gives resistance against very variable temperature ranges. Its maintenance is very simple and it is only necessary to use a cloth slightly dampened with soap and water, without the need of any cleaning product savings.

FINISH

White

COMPATIBILITY

Simon 27 Play mechanisms

PACKAGING CONTENTS

Frame with intermediate part with 4 half elements and frame holder.

MATERIAL

Plastic
