Pivoting plate with light beam orientation for courtesy light ivory Simon 82

REF. **82036-31**

BASIC INFORMATION

DESCRIPTION

Tilting plate with light beam orientation for the courtesy beacon. It has a discreet and stylish finished in ivory colour and is part of the Simon 82 series, it is available in six finishes, which gives enormously versatility in terms of decoration and design. However, the recommendation of the brand, it is necessary to choose the frame in the same colour as the plate in the baseboard. Although the reality is that the possibilities are many. It measures 55 x 55 millimetres and allows the installation in surface-mounted or embedded. is the individual version of the plate, with a signaling function and a single element, its manufacturing material is thermoplastic, a very characteristic of Simon products. This component, similar to the plastic, maximize the features of the product in terms of security and service life. It can withstand temperatures very variables and extreme temperatures (-25 to + 50 degrees centigrade). For cleaning and maintenance you just need to use a cloth slightly moistened in soapy water, with a very soft, which does not damage the product.
