

Frame with 2 elements for trunking white Simon 75

REF. 75621-30

BASIC INFORMATION

DESCRIPTION

With the frame for two elements with white finish in colour belonging to the Simon 75 series, its installation is really simple thanks to the compatibility with the mechanisms of the Simon 77 series, which allows a simple installation in just two steps: Insert and tighten, thus avoiding any contact with the wire when peeling or braiding it. Enjoy the multiple colour combinations, with an extensive range suitable for all types of decorative spaces. The design selects from the infinite combinations available to choose from among 13 frame finishes, with parts pieces in 15 different colours and rockers to choose from 6 colours. In this way, the Simon 75 series wants to make the most of the combination of elements.

FINISH

White

MATERIAL

Thermoplastic
