

Frame for 2 elements warm white Simon 82 Detail Original

REF. 8200620-029

BASIC INFORMATION

DESCRIPTION

This product is part of the Simon 82 range, specifically is part of the Detail Original line of this series, it is a frame that is perfect for mechanisms that siempre energy to two elements or electrical equipment. It measures 93 x 164 millimetres and its installation system is very simple, offering the possibility to do so by recessed or directly on the surface-mounted. The frame is presented in a beautiful warm white finish, which integrate perfectly in any area of the home, office or place where it is placed. To ensure the harmony decorative and appearance, it is recommended to combine the frame with rockers and covers of the same colour bank. The manufacturing material of the frame is very good quality and consists of thermoplastic socket and thermostable frame, which gives the product a resistance is required against challenges external and temperatures or very high or very low. This also extends the service life of the product and increased its security.
