

Spare part square sealing gasket for IP66 watertight floor box with 1 Simon K45 mechanism

REF. KFS1002

BASIC INFORMATION

DESCRIPTION

The square sealing gasket for the IP66 version of the Simon K45 series has dimensions of 130 x 130 x 2 mm. With a very innovative design thanks to the avant-garde lines that define its shape, we are looking at a product intended as a replacement for the square sealing gasket that fits between the housing and the device mounting unit. The mounting unit is not included. The self-extinguishing, halogen-free thermoplastic is the compound used to manufacture its resistant and durable structure. This material ensures no flame propagation in the event of a fire and low toxicity in case of smoke emission, making it one of the safest elements in this range. All of this is offered at the best value for money available today in the sector of products intended for electrical installations in homes and businesses.
