Interchangeable case for 1 element frame translucent grey Simon 27 Play

REF. **2700617-112**

BASIC INFORMATION

DESCRIPTION

Thanks to the products that make up the Simon 27 Play series, the decorative possibilities of the frames with independent intermediate piece are infinite, we can perform. With these elements, customers can give a different touch to their electrical installations in homes or businesses. For example, if you choose the interchangeable cover for frame 1 element in translucent grey finish that you can use perfectly with transparent rockers and covers. It is an intermediate piece that is very easy to position on the frame, without the need for tools, being suitable for surface and flush mounting. The sleeve has been manufactured in thermoplastic material of the highest quality and high thermal resistance, measuring 86x93 mm As all products of the Simon series, this intermediate piece stands out as a decorative and functional element, as well as offering the best performance at the most competitive price.
