

Double-pole switch 16AX 250V~ with screw terminal connection system white Simon 32

REF. 32131-35

BASIC INFORMATION

DESCRIPTION

The switch is one of the most important elements for the operation of an electrical system. Thanks to these control mechanisms you can have control over the use of the same. With an intensity of 10 AX and a voltage of 250V ~, the two-pole switch with screw terminal connection system white in colour of the series Simon 32 is designed to meet this objective, a perfect element to use the control unit square opening insert for frames with circular control unit opening. Its structure is designed to withstand intervals of high and low temperatures, being a soft and dry cloth is enough to clean it and avoid oxidation over time. The series Simon 32 is a symbol in the world of the switches and control mechanisms thanks to its design, its functionality and its shapes that updated any department of a housing, commercial premises or headquarters of company or industry.
