

Voice and data flat plate with dust cover for 1 element and 1 RJ45 connector category 6 FTP white Simon K45

REF. K96F/9

BASIC INFORMATION

DESCRIPTION

The series Simon K45 has been designed to connect all those environments or workplaces in which the speed, usability and simplicity are more than necessary. Thanks to its mechanism collection any connection, whether voice, data or multimedia, is represented in this collection. As this plate of voice and data, has a flat plate, with dust cover to maintain untouched connections and has two RJ45 connectors of the category 6. It is manufactured in white colour, it supports a wire cross-section of 22-24 AWG and is very easy to install, since it can be done by surface-mounted or recessed. Like all Simon products, it is also simple, as only we'll need a soft, dry cloth and avoid abrasive cleaners or cloths. Recommend any product containing chlorine, as they may damage the mechanisms. The series Simon K45 is, therefore, the most complete collection on the market for any type of connection in work spaces.

FINISH

White

COMPATIBILITY

Simon K45 enclosures for installation in the wall, floor, ceiling and furniture and Simon 500 Cima enclosures (need to be combined with the K45 to 500 Cima adaptor ref.50012088-030)

PACKAGING CONTENTS

Flat voice and data plate with dust cover, category 6 UTP RJ45 connector and installation manual

ETIM CLASS

EC000018

REMARKS

When combining the voice and data plate in vertical housings (mini columns, columns, Teleblock, channels, mechanism holders, etc.) you must use the 90° positioner (ref. K66) to guide the plate into a vertical position.
