

Interchangeable case for 1 half element American frame black Simon 27 Play

REF. 2700651-071

BASIC INFORMATION

DESCRIPTION

Suitable for flush mounting, the Simon 27 series has the interchangeable cover for American frame of 1 half an element in black finish. It is recommended to combine this piece with white rockers and covers. It stands out for its high resistance to knocks and scratches, a quality it has thanks to the thermoplastic materials with which it has been manufactured. This makes it the perfect frame for environments with extreme temperatures, such as in certain workplaces or homes. Its dimensions (86x125 mm) allow it to be assembled in two directions, depending on whether the plate is placed horizontally or vertically. Once again, Simon offers its customers the simplest solutions to optimize the decoration of any room, while presenting products with great performance. The interchangeable sleeves of the Simon 27 series are a simple and very useful tool to give a different touch to a room and contribute to the renovation of the decoration.
