REF. 75540-39

### BASIC INFORMATION

#### DESCRIPTION

In the world of information technology, a good connection is synonymous with good service. This characteristic will have a direct relationship with the quality of the work we do. To achieve this goal we can use the RJ45 AMP type connectors computer connector of category 5e UTP. Its terminal connection and operation is by insertion. The quality is one of its advantages over competitive products thanks to the metal components with halogen-free thermoplastic insulation with which it has been manufactured, as well as the number of connections and wires it contains: Eight. Like the rest of the products included in the range of articles of the Simon 75 series is designed to be highly resistant to high temperatures, which ensures a long life span. Your value for money? The best there is currently on the market.
