

Frame for 1 element blue translucent interior white Simon 82

REF. 82613-64

BASIC INFORMATION

DESCRIPTION

Frame designed for 1 element, the dimensions of the piece are 89x87 mm The frame is translucent blue in colour, with the white indoor. That is why it may be wise to use the same white for the finishing of the rockers and covers to be used, the manufacturing material is thermoplastic baseboard and frame, common to the parts belonging to the Simon 82 series. The features of the product make it capable of withstanding temperatures between 5 and 40°C, even being able to withstand maximum temperatures of -25 and 50° C. For proper cleaning, use a cloth moistened in soapy water. We do not recommend, in any case, to clean the piece with cleaners that can be corrosive and that include chlorine in their formula. You can choose between recessed or placed on a surface-mounted to perform the installation.

FINISH

Translucent blue

COMPATIBILITY

Simon 75, Simon 77 and Simon 82 mechanisms

PACKAGING CONTENTS

Frame with 1 element

MATERIAL

Plastic

ETIM CLASS

EC000007
