Plate for electronic mechanisms aluminium Simon 82

REF. **82080-33**

BASIC INFORMATION

DESCRIPTION

With universal dimensions of 55x55 mm, which are ideal for easy installation in a few minutes on the surface-mounted or recess in a wall, the Plate for electronic mechanisms in aluminium of the Simon 82 series allows you to choose the frame with the same baseboard colour as the rocker selected from the six finishes available in our catalogue. This is a plate developed with galvanized thermoplastic composite materials of the highest quality, which translates into a long life span for many years without losing any of its qualities. The resistance is another of its main features, having been designed to withstand all types of environments with high and low temperatures and humidity intervals. It also complies with the current regulation, so we are one of the most complete plates on the market. In addition, its price makes it perfect for masonry or renovation projects with all kinds of budgets.

FINISH

Aluminium
